DOVICO™ SOFTWARE

DOVICO Timesheet is an easy-to-use project time and cost savings solution. This software improves overall business efficiency and gives you complete control of project budget vs. actual information with real-time reporting.

DOVICO Timesheet

Project Time & Expense Tracking Made Simple

Success is attained through constant improvement. Part of this goal is reached by understanding exactly how employees spend their time and what expenditures are made each and every day. Budgets and estimates are only useful if you actually stick to them. To achieve this, you need to track every hour in real time. Our software has been tested and proven by thousands of companies like McAfee, Inc, Merrill Corporation and Sisters of Mercy Health System. Whether you are currently a leader in your field or on your way to becoming one, DOVICO Timesheet™ helps increase your profits.

"I would like to say thanks to DOVICO for offering such a wonderful product that has provided an easy way for end users to log time, but has also lead to savings estimated around 20k per year.

Jeremy F. *Merrill Corporation*

Adopted by Employees

Employees need access to information in real time to make informed decisions and optimize productivity. This can be attained by incorporating our software in their daily routine. DOVICO ensures fast access to data and integrates to popular software like Microsoft Project® and QuickBooks®

Trusted by Executives

Executives need accurate information so they can evaluate their company's past performance and prepare for the future. They want to answer critical business questions quickly without having to sift through reams of data. With DOVICO's powerful analytics, executives will finally possess the real-time information they need.

Critical for Managers

Managers need to have a clear understanding of their employees' activities and insight into how their projects are coming along. DOVICO provides powerful project time and costing software so your managers can be confident that their teams are producing at full capacity. Seeking to improve the bottom line, managers are required to aim for leaner and smarter operations, and with over 135 different customizable time and cost management reports you will see results.

Project time tracking and job costing

Time and expense entry for billing

Time management metrics

Time, costs and expenses reports

DOVICO Timesheet
Project Time & Expense Tracking Made Simple

Whether you are managing projects or not, DOVICO Software is the ideal solution to improve your project leadership, while gathering timesheets and staying on top of expenses more efficiently. Our software contains many powerful and useful features that are specifically designed – through feedback from customers like yourself – to contribute to corporate success.

Features
