

Sage Live combines the performance of a revolutionary new real-time accounting engine on the market-leading **Salesforce1™ cloud platform.**

Reinvent the way you work

Now you can run your business in the moment. Sage Live brings your data and people together like never before with a real-time accounting solution that's inherently social, mobile, and global. Built on the world-class Salesforce1™ platform, the Sage Live accounting engine integrates financial data and customer insights across a seamless ecosystem to deliver answers when you need them.

One office, front to back

With Sage Live and Salesforce CRM built on the same Salesforce platform, your apps share the same infrastructure, database, development tools, reporting tools, and user interface. That real-time integration allows you to manage your finances and customers from a single hub. Plus, Sage Live supports multiple currencies, languages, tax settings, and posting rules, ensuring multi-country compliance. Now you can run your company as a collaborative, real-time network instead of a bureaucratic hierarchy of siloed departments and offices.

Real-time 'one source of the truth' — in the palm of your hand

The cloud-powered platform makes it easy to run your business from any connected device. Customized scorecards provide alerts, approvals, and notifications of important transactions on tablets, smartphones, and smart watches. No more waiting on month-end reports to make important decisions. Access real-time accounting and business-critical performance data, wherever and whenever you need it.

Multi-dimensional design

Sage Live provides a simplified, streamlined, multidimensional chart of accounts with unlimited tagging capabilities for capturing and analyzing data. You have the ability to add any number of accounts, subaccounts, and other custom dimensions specific to your business, and any number of tags for each dimension.

Less complexity, more control

With everything on a single platform, Sage Live ends the need for expensive integrations or upgrades. It also means better tracking through audit and change logs that ensure notes and decisions are tied to your numbers. Nothing gets lost, and you get a more complete financial picture without the burden of endless spreadsheets.

Extensive app marketplace and API support

The Sage Live Marketplace delivers world-class apps and partnerships designed to make business more efficient, enable electronic trading and interactions, and eliminate manual data entry. Easily integrate Sage Live with other critical applications such as HR, payroll, payments, CRM, and more to run your business your way. Sage Live offers secure and discoverable APIs to support ad-hoc integrations by third-party developers.

About Sage

We serve over 3 million small & medium businesses in 23 countries with over 14,000 employees.

Small and medium businesses know Sage as their champion to help them energize, manage and grow their businesses. They look to us to bring them the technologies and innovations they need to energize their employees and communities.
