# Sage Enterprise Intelligence for Sage 300

One solution for business intelligence and data management.

Make informed decisions with real-time data using Sage Enterprise Intelligence (SEI) for Sage 300. SEI empowers all users with a simple and flexible solution for analysis and reporting and eliminates the need for disparate tools and specialized skills.

## Manage your data

Migrate or consolidate data from multiple sources and locations, like legacy and third-party systems, and then analyze and report all in one solution. With SEI DataSync, you can easily extract, transform, and load your data and save time and money on custom development and infrastructure costs.

## Gain visibility and insight

Measure the performance of your business and get a complete picture of your finance and operations. SEI helps you make data-driven decisions faster by bringing you real-time data from multiple platforms, on any device, and in a user-friendly interface. You can access your reports on the web, mobile, and in Excel.

## Empower all users

SEI empowers all employees, technical and non-technical, and removes the barrier of relying on IT to provide users with the reports they need to do their job. With a few clicks, you can create and customize views for your specific requirements. Analyze your data with over 100 visualizations and flexible reporting with advanced calculations and customization options.

## Collaborate securely

Share reports and schedule the distribution of reports with internal and external stakeholders and decide what each recipient will be able to access. You can also markup and add comments to draw attention to critical information. And with automatic distribution, you can get access to advanced features such as conditional alerts, data security, reporting packs, and more.

## The top reasons Sage 300 users choose SEI:

### Fast loading times:

Experience better performance with large amounts of data, every time you log into SEI.

### Multi-company consolidations:

Merge multiple Sage 300 accounts into one destination database and build your reports from there.

### Embedded in Sage 300:

Access your reports from the Sage 300 menu panel. Everything available in SEI can be embedded in the Sage 300 web screens.

### Budgeting and forecasting:

Automate budget creation and forecasting in SEI and facilitate your analysis of actuals vs projected.

### Add optional fields in reports:

With just a few clicks, you can customize your tables and views and keep the same optional fields you have in Sage 300.

### NEW! Seamlessly convert Sage Intelligence reports:

Move your Sage Intelligence reports to SEI in no time and keep the same reporting format with our user-friendly conversion tool.
