Conligo eCommerce Connect

Connecting your eCommerce and ERP

Conligo eCommerce Connect provides an easy way to get your customer, payment, and order information from any ecommerce system or custom app back to your Sage 300 or ERP platform. Your staff will be able to view and instantly process orders for customers without having to re-enter information into the ERP, thus avoiding costly mistakes!

Syncing eCommerce Data in a Flash!

WHY CHOOSE US?

- + EFFICIENCY**
 Conligo eCommerce Connect eliminates the need for double data entry and provides a seamless gateway to your online ecommerce portal. Save time and money by letting eCommerce Connect do the work for you!
- + EASE OF USE**
 Conligo eCommerce Connect is easy to set up. Use our API to pass data between your ecommerce solution and your Sage 300 or ERP platform.
- + SUPPORTS**
 Conligo eCommerce Connect supports not only ecommerce applications, but also custom solutions, including spreadsheets or CSV files that have information that needs to be integrated into your Sage 300 or ERP.

GREAT SERVICES

- + Supports all major e-commerce platforms for seamless integration of data with your ERP.
- + Eliminates manual re-entry of customer information and order details into your ERP.
- + Integrated into all the Conligo family of products for seamless management.
- + Provides analytical data and information on your customers' transactions and services.

Sage 300 and Other ERP Systems

Conligo eCommerce Connect integrates seamlessly into Sage 300 and other ERP systems. Move your existing ERP or accounting platform into the cloud by taking advantage of specific B2B applications without the big investment.
