

Canada's most comprehensive cannabis ERP

Canix helps Canadian operators of all sizes to analyze yield data, calculate profit per gram, and run a more profitable business.

How we do it

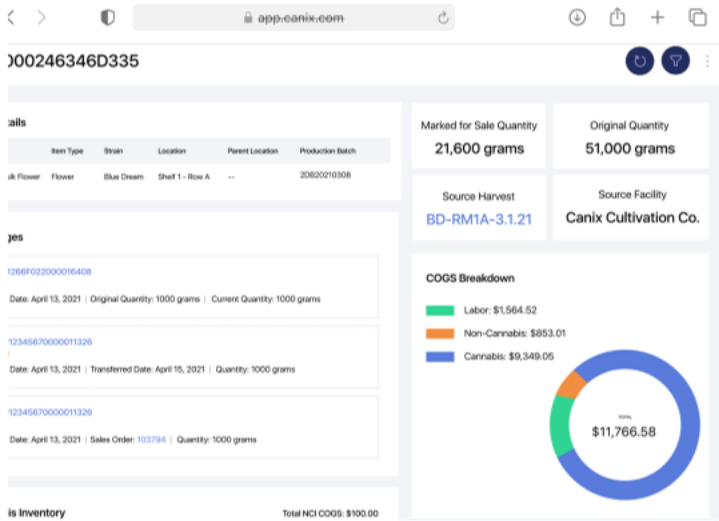

Canix works with companies across the globe to provide a suite of software tools that automate data entry throughout the supply chain and enable advanced reporting for operators. Canix connects companies to state reporting systems such as Metrc and integrates with hardware systems including: mobile phones, scanners, and scales.

Customer success

- ✓ **2,300+ facilities managed** across the globe
- ✓ **96.9%** Customer Satisfaction Score
- ✓ **\$500M+** in orders processed through Canix

Web app for extensive data and reporting

Replace legacy & complex compliance systems with an easy-to-use interface, integrated with all your favorite tools.

Mobile app for data entry on the fly

Enter data in the field or in the warehouse. Don't tether your workers to a desk or internet connection when they need to update inventory or create a sales order.

For cultivators

Our cultivators save up to 2 hours per employee with our RFID scanning capabilities, WayFast scale integration, task management, and other solutions.

For manufacturers

Our manufacturers have saved over 3 hours a week by using our Batch templates, automatically updating inventory list, and custom label printing solutions.

For distributors

Our distribution customers have saved over 3 hours a week by using our mobile sales orders, transfer tracking systems, and other solutions.

Cannabis seed-to-sale software that works for you.
